PROFESSIONAL SUMMARY

A full stack web developer with experience in backend and frontend technologies. Detail-oriented dedicated individual with technical and analytical skills seeking to secure a responsible career opportunity to fully utilize my experience and skills, while making a significant contribution to the success of the company.

PROFESSIONAL EXPERIENCE

Full Stack/Senior Developer

Softtech Multimedia, Australia   2019 December– Present

- Developed Restful APIs using Laravel to be used with JS frameworks like React and/or VueJs.
- Implemented Laravel as backend, MySQL as database and VueJs along with Vanilla JavaScript, SCSS/SASS as frontend for interactive design
- Made use of agile technologies to develop and track applications
- Used git and GitHub to keep up with the updates of the websites and applications
- Deployed applications/websites in AWS
- Guided and lead a team of developers for projects based on Laravel as backend.

Works:

- Developed a news website for Namuna Group of Companies, a Japan and Nepal based organization (https://namunasnews.com). Created Laravel APIs and helped in integration with JS Framework, React.

Full Stack Developer

Freelance Developer   2018 July– 2019 December

- Provided support to customers for training and installation of web applications developed using Laravel and MySQL
- Made use of Vanilla JavaScript and SCSS/SASS for better control of styling along with other frameworks like VueJS and/or React as frontend for websites and web applications
- Developed and outsourced projects as well as APIs required for application development.
- Kept up to date track of websites and web applications in github using git version control tools and technologies.
- Deployed applications and websites in cloud platforms and/or AWS

Works:

- Developed a website for café (bigbroscafe.com); still in development. Used Laravel, VueJS and MySQL along with HTML, CSS and JavaScript for development.

Senior Laravel Developer

GeoWeb Solution Nepal   2016 October – 2018 March

- Provided technical support for clients with network and hardware installation for system installation
- Developed websites and web applications using Laravel and MySQL along with jQuery and AJAX
- Develop and install Laravel projects in local server and cloud servers
- Provided training to the users on using the developed systems.

- Dealt with customers about the requirements of the projects and updated the progress respectively.
  Works:
  - Developed an inventory management system using Laravel and MySQL for different retailers and suppliers that could perform stocks calculation, printable ledger and reports generation, database backups and included other features.
